

Luther Seminary Cloud Systems Access Policy

I. Overview/Purpose

This policy clarifies the access requirements for Seminary contracted cloud systems. This is to ensure that during times of staff turnover access to cloud systems is not lost or interrupted.

II. Scope

This policy applies to any cloud-based IT system under contract (explicit or implicit) with the Seminary.

III. Definitions

Cloud-based IT system - An information system delivered from off-campus or cloud servers.

IV. Policy

Any Seminary contracted cloud system will have at least one administrator account assigned to the information technology department.
